
kmerseek: set A exon queries (exon plus 20 residues each side) against the regions index (Swiss-Prot 2026_03 annotated regions, no mammals; PR 114). protein20 k = 5 left out: no E-values in this kmerseek build.
best hit from aro_hyd_chg_pol4, k = 11
best hit from aro_hyd_arg_chg_pol5, k = 9
best hit from hp_pbotc_1st_ed2, k = 21
Spearman ρ = 0.00 (n = 1,063)
Spearman ρ = -0.09 (n = 1,063)
Spearman ρ = -0.01 (n = 1,063)
