
Variants in one group have the same encoded sequence, so any predictor reading only the encoding gives them one value.
hp_lehninger2 (2 letters), 335 groups
dayhoff6 (6 letters), 978 groups
shown at right: largest ranges (selected extremes)
shown at right: drawn at random
a
Share of collision groups with this range or less
Range of scores within the group (highest minus lowest)
one replicate
mean ± standard error
wild type (1)
nonsense mean (0)
