

c

```
kmerseek call on position (a global alignment of the two proteins pairs these same residues)
human   364 GPPGTAGLPGELGR 377
            || | |||||| ||  11 of 14 identical
chicken 362 GPAGAAGLPGEVGR 375
            22222225223524  human, dayhoff6 class
            ||||||||||||||  14 of 14 same class
            22222225223524  chicken, dayhoff6 class

kmerseek call off position (IoU 1.0 with the exon): a global alignment puts these human residues
at chicken 297-314, not on this exon; they are another copy of the Gly-X-Y collagen repeat
human   299 GPPGPPGPAGEPGKPGAP 316
            || |  |  || |  | |  9 of 18 identical
chicken 362 GPAGAAGLPGEVGRAGPP 379
            111111111131141111  human, polarity4 class
            ||||||||||||||||||  18 of 18 same class
            111111111131141111  chicken, polarity4 class
```
