SPLASH
anchor counts, DESeq2
all tested anchors (sample)
c: reached by a gene-unique peptide
c: reached only by peptides shared with other genes
b: even spread; d: expected by chance
a
simulated control
young 2 h
young 24 h
share of anchors
bases that differ between the two top targets
b
peptides, density (1 = even spread)
start (N)
end (C)
position of peptide along protein
c
genes reached
1,767
90% only shared
not run in control
3,442
61% only shared
1,743
68% only shared
9,585
51% only shared
895
60% only shared
SPLASH
anchor counts
d
share moving the same way in every pair
9,364 SPLASH anchors with 4+ pairs counted
32,866 SPLASH anchors with 4+ pairs counted
13,046 SPLASH anchors with 4+ pairs counted
