a
Reads cut from CDS
paper-list genes, right frame
paper-list genes, wrong frame
random genes, right frame
random genes, wrong frame
Reads (% of the gene set's reads)
Share of chosen frame's k-mers in Swiss-Prot
b
Real reads lying wholly in a CDS
Reads (% of the gene set's reads)
Share of chosen frame's k-mers in Swiss-Prot
c
Reads (%)
Cutoff on share of k-mers in Swiss-Prot
right-frame reads kept (% of right-frame reads)
kept reads with the right frame (% of kept)
reads cut from CDS
real reads wholly in a CDS
cutoff 0.5 (Olga's)
cutoff 0.1 (chosen from this test)
d
Reads with the right frame (%)
bar + reads with no stop-free frame or no Swiss-Prot match
dayhoff k12, orpheum
protein k5, orpheum
protein k6, orpheum
protein k7, orpheum
cut from CDS
real, whole read in CDS
real, partly in CDS
real, no protein hit
