TOOLS: kmerseek 0.4 (3c353d4), best of 164 settings, against reviewed Swiss-Prot 2026_03; the other tools and scans as in F1
HYPOTHESIS: higher is better; 0 means the method reached no ice-binding protein outside the query's own lineage
CONCLUSION: 5 of 54 method-query pairs reach any protein of another lineage, and 3 of 108 control medians are above 0
