TOOLS: kmerseek 0.4 (3c353d4), hsdm17.k6.s1.lcfalse.extend-c0.18, against reviewed Swiss-Prot 2026_03
HYPOTHESIS: a real query should reach more than a draw that keeps its composition, or its composition and repeat period, at the same score cutoff
CONCLUSION: the most any draw reaches is 0; the real query reaches 0 everywhere except the bacterial one
