Every kmerseek-only link at E < 1: Botryllus protein to a Swiss-Prot target in each category (kmerseek, best of 174 alphabet and k-size pairs)
At least 5 points above chance identity (n = 100)
Less than 5 points above chance identity (n = 219)
No identity: residue strings differ in length (n = 16)
MHC class I and II
MIC / ULBP (NKG2D ligands)
Antigen presentation (TAP, B2M, CD74, ERAP)
NK receptors (KIR, LILR, KLR)
T cell receptor and CD3
C1-set domain proteins
Non-vertebrate self/non-self
Minor histocompatibility antigens
