kmerseek (any of 174 alphabet and k-size pairs, scaled 1); kmerseek-only = no phmmer, jackhmmer or mmseqs2 hit at E <= 10 on the pair. Query: Botryllus. Target: Swiss-Prot minus Ascidiacea.
kmerseek-only, observed
Expected from control at the same lengths
a
Number: targets reached / all targets
MHC class I and II
MIC / ULBP (NKG2D ligands)
Antigen presentation (TAP, B2M, CD74, ERAP)
NK receptors (KIR, LILR, KLR)
T cell receptor and CD3
C1-set domain proteins
Non-vertebrate self/non-self
Minor histocompatibility antigens
