kmerseek (all 174 alphabet and k-size pairs, scaled 1). Query: Botryllus. Target: Swiss-Prot minus Ascidiacea. A region can be dropped for more than one reason.
At least half low complexity
At least half transmembrane helix
Target residues not in the named target
Kept
MHC class I and II (521 regions)
MIC / ULBP (NKG2D ligands) (25 regions)
Antigen presentation (TAP, B2M, CD74, ERAP) (6_889 regions)
NK receptors (KIR, LILR, KLR) (371 regions)
T cell receptor and CD3 (1_635 regions)
C1-set domain proteins (5 regions)
Non-vertebrate self/non-self (379 regions)
Minor histocompatibility antigens (373_056 regions)
Control (length-matched random) (107_102 regions)
