frame of the read, relative to its true frame (light grey vertical lines: cutoffs 0.1 and 0.5)
true frame
same strand, 1 nt off
same strand, 2 nt off
opposite strand (3 frames)
a
simulated reads cut from CDS, protein 7-mers
b
real reads wholly in a CDS, protein 7-mers
c
simulated reads cut from CDS, Dayhoff 12-mers
d
real reads wholly in a CDS, Dayhoff 12-mers
share of frames with at least this share
share of the frame's k-mers found in Swiss-Prot (x)
