TOOLS: linked word pairs counted directly; setting protein20, words of 4, every pair, spacing // 3 in key; held-out queries; Swiss-Prot 2026_03
HYPOTHESIS: the cross sits right of the vertical bar on both lineages (10 points above the best exact k-mer and the null C median)
CONCLUSION: the cross is left of the bar on both: KILL
best exact k-mer (nb 295), random share <= 1%
null A median
null B median
null C median
