

Human proteome, about 100 proteins per seed: $\blacklozenge$ k_{main} , measured $\circ$ Equation 4b

Swiss-Prot 2026_03, 1 chance match: $\bullet$ k^* , Equation 4b $\bullet$ k_{max} , Equation 4b

|| one k-size to test, from k_{min} to k_{max} (number of k-sizes at right)

Bits per letter in Equation 4b: from Swiss-Prot composition; for k_{max} , measured in the human proteome
