TOOLS: kmerseek 0.4 (3c353d4), hsdm17.k6.s1.lcfalse.extend-c0.18, chosen on the four other lineages; target database reviewed Swiss-Prot 2026_03
HYPOTHESIS: kmerseek beats the best scan that needs no search by at least 0.10 on both held-out lineages
CONCLUSION: FAIL: kmerseek reaches below the black line on 2 of 2 held-out lineages
